Sports	Volleyball Team (Girls) (Yearlong)	Monday & Friday	20	✓	✓	✓	✓	✓	✓		Learning different skills and tactics of Basketball and represent school to join the inter school competitions.	Teamwork, Preseverance	\$500

STEM	AI, ChatGPT and Basic Robotics (Yearlong)	Tuesday	10	✓	✓	✓	✓	✓	<p>Objectives / Purposes: Artificial Intelligence (AI) is a current topic of much interest. Most research shows this area of technology has a definite and dramatic impact to the world. Robotic Arm extends the application of AI to address real world physical problems.</p> <p>In fact, AI requires the use of advanced mathematics. Usually we need a good foundation on mathematical training. However, due to computer programming becoming more common in the education environment, we can demonstrate the function and power to student by first following examples; i.e. we can play with AI. This can stimulate participants and they would independently develop their own interest on AI topics. Robotic arms give them a chance to apply their AI knowledge for robotic automation.</p> <p>In the first part of the program, students will learn to appreciate the current state-of-the-art in AI and its on-going developments. Further, students are to experience AI by actually working with various development tools such as “Teachable Machine”, ChatGPT and “App Inventor”. After the program, they will be equipped with skills to build machine learning models, develop recognition and synthesis applications which can be readily deployed in mobile devices.</p> <p>In the second part, students’ skills and knowledge are developed from scratch with no prior assumption. Methodically, we lead the students to understand, build, test and operate a model robotic arm step-by-step. During the process, students will learn how to use a simulator to create and test their applications. In addition, the students will be taught how to use a Java platform to develop a rich graphical user interface (GUI) for their applications. They will also be instructed on how to apply the concept of Inverse Kinematics for implementation on a Java emulator platform. Finally, the students are to assemble their own robotic arm and connect them to a control module for testing as well as manual and automatic operations. Simple robotic arm system projects will also be attempted to illustrate typical real-world application scenarios.</p> <p>Software skills acquired:</p> <ul style="list-style-type: none"> • Teachable Machine • App Inventor 2 • ChatGPT • TinkerCAD (Circuits) • Arduino IDE • Using the Processing software <ul style="list-style-type: none"> o implementing IK in Java o implementing a simulator for robotic arm movement with rich GUI features <p>Hardware and Robotics skills acquired:</p> <ul style="list-style-type: none"> • Testing servo motors on a mini-robot • Interfacing Human operator board (VRs, buttons and LEDs) to robot controller (Arduino) using wire-wrap technique • Direct manual manipulation of robot arm servos for simple movement • Programming the robot arm for simple tasks • Implement Inverse Kinematics in Emulator (with rich GUI) • Programming robotic arm movement with spatial coordinates • Develop repetitive robotic arm applications <p>Project Promo Video bit.ly/AI101-Promo</p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>機械臂發展</p>  </div> <div style="text-align: center;"> <p>Tinkercad</p>  </div> <div style="text-align: center;"> <p>Arduino Programming</p>  </div> </div>	Curiosity Appreciation of Beauty & Excellence Creativity	\$2,700

Introduction to Digital Sketching

Learn various basic techniques of Procreate

Drawing on an IPAD with Apple pencil, students are expected to acquire the following basic skills:

- different pen strokes,
- styles and coloring
- simple character designs

Students will understand the basic skill set of digital sketching and be able to create their own pieces after the program.

Skills covered:

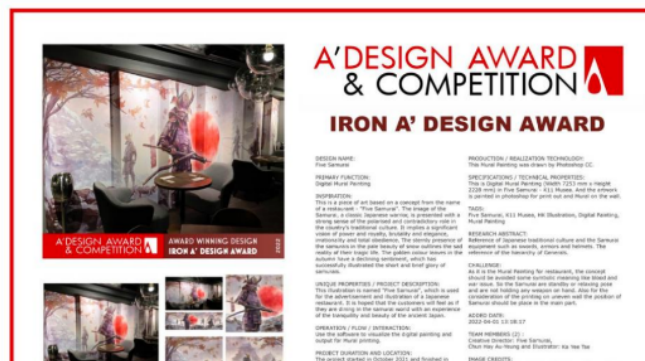

- Basic Procreate functions
- Mastering the use of Apple Pen
- Basic drawing skills (Lighting, shading, coloring etc.)
- Cartoon character drawing styles
- Scene drawing styles
- Self Portrait (NFT 头像)
- Stroke usage for illustration
- Mindset of illustration usage
- Review and demonstration the use of AR in modern illustration works (Augmented Images)
- Appreciate the use of AI art generator for obtaining concept drafts

STEM	Learning Mathematics with Lean** (Yearlong)	Flexi Time	Flexi Time	✓	✓	✓	✓			In this ELA, students will explore how to formalise mathematics using the Lean theorem prover, starting with “the natural number game”. Depending on their interest and progress, students are free to try a wide range of topics, such as set theory, logic, number theory and abstract algebra.	Curiosity Love of Learning Self-regulation	\$0
STEM	Mathematics Club (Yearlong)	Friday (Week A)	4	✓	✓	✓	✓	✓		- To promote Mathematics learning in daily life - To let students learn Math in a fun way	Creativity Curiosity Love of Learning	\$0
STEM	Programing Team (HKOI) (Yearlong)	Tuesday	10	✓	✓	✓	✓	✓		Hong Kong Olympiad in Informatics (HKOI) is an annual software programming competition for secondary students in Hong Kong. It will emphasize on problem solving techniques and programming skills. The objective for this team is to train up student for the competitions	Love of Learning Perseverance Judgment	\$0
STEM	STEM Team** (Yearlong)	Flexi Time	Flexi Time			✓	✓	✓		To develop skills in STEM discipline and conduct research	Creativity Perseverance Self-regulation Teamwork	\$0
STEM	Technology Competition Team (Yearlong)	Flexi Time	Flexi Time	✓	✓	✓	✓	✓	✓	- Promote student interest in technology and engineering. - Provide students with opportunities to develop their problem-solving and critical thinking skills. - Encourage students to work collaboratively and to communicate their ideas effectively. - Prepare students for careers in technology and engineering. - Build a sense of community among students who are interested in technology.	Creativity Love of Learning Teamwork	\$0
